

# Osteoarthritis and Cartilage

*Osteoarthritis and Cartilage* is an international fully peer-reviewed multidisciplinary journal published by Elsevier Ltd on behalf of the Osteoarthritis Research Society International and the International Cartilage Repair Society. The Journal provides a forum for the dissemination of ideas for the many kinds of specialists and practitioners concerned with osteoarthritis.

A primary objective is to foster the cross-fertilization of findings from both the clinical and basic sciences of the disciplines involved, including osteoarthritis, cartilage, molecular biology, clinical pharmacology, orthopaedics, rheumatology, physical medicine, biochemistry, epidemiology and collagens.

Rapid review and publication is a feature of this journal and there are no page charges to authors. We aim to publish all accepted articles within the next immediate issue of the Journal. All articles are published simultaneously in print and electronic format via Science Direct.

The journal is abstracted and indexed by ISI/Current Contents, Index Medicus, Medline, Pubmed, Sociedad Iberoamericana de Informacion Cientifica (SIIC) Data Bases, and EMBASE/Excerpta Medica.
